Treed by a Deer.

Doubtless there is no game in the west which to the average sportsman can compare with the prairie chicken. Larger game must be hunted longer and with greater cost and be hunted longer and with greater cost and care, but the countless prairie chickens are always to be found in season and out of season along the border of civilization, and at the time of which I write—say thirty-five years ago—I could by walking a mile out of the little village where I lived, find good shooting without the ald of a dog. They start up out of the prairie grass right from under one's feet and then the supple trigger and quick eye was enough to bag the game.

One dreamy October afternoon in the fall of '57, not having any particular rush of business, I took my gun and strolled out

Our Journal did not appear last week, as our editor had a severe attack of la grippe, but is now recovering.

One dreamy October afternoon in the fall of '57, not having any particular rush of business, I took my gun and strolled out towards the open prairie, intending to extend my walk down nearer the river than I had formerly been, with the hope that I might bag a wild goose or brant. The whistle of the ployer and quail were music in my ears but I made my way along without noticing them and even let the chickens go, intending to secure what I wanted, if any, on my return later in the day.

On reaching the river I carefully reconnoitered for geese and finally saw half a dozenor so standing on a log just out of the water, and though they evidently saw me they showed no alarm but stood looking at me. I had charged my gun with buck-shot and when within perhaps ten or twelve rods of them, I deliberately took aim and fired both barrels at the broad breasted fowl, and I'll be hanged metaphorically if I didn't hear the shot strike them as plain as day. But do you suppose I hurt 'em? Not any. They just looked sorrowfully at me a moment, and spreading their broad wings sailed up the river. I tearned afterwards that you can't kill a wild goose that way.

I was disgusted, and flinging the gun

kill a wild goose that way.

I was disgusted, and flinging the gundown I seated myself among the branches of a fallen tree and leaning back in a comfortable position listened to the various sounds of insect and animal life. The droning bees, the sunhsine trickling through the quivering leaves and the soft breath of the autumn breeze fulled me to quiet, and I slept. How long I slept I do not know, but I was awakened by a terrific crash and a bellowing sound that frightened me terribly. Springing to my feet I saw directly in front of me an enormous stag. His antiers were immense and as he glared at me he lowered them onuiously, meanwhile sticking his hair forward and stamping like a sheep at the sight of a strange dog.

I was paralyzed for an instant and when I attempted to move he sprang at me and

I attempted to move be sprang at me and drove me back into my seat with the force of a pile driver and nothing but the shelter of overhanging limbs saved me from instant death. His powerful antiers would have gored my life out could be but have reached me. He stood and glared at me in his impotent rage for a short time and then tried to bite me, but I kicked his nose which made him fairly bellow with madness. Then he tried to strike me with his enormous hoofs but I gave him a few gashes on his shins with my pocket knife which acted as a deterrant and he quit that.

My gun lay only a few steps away but what of that? It might as well have been in Texas for all the good it did me. There he stood watching every move of mine and making ineffectual efforts occasionally to stab me with an antier. The sun sank in the west and the stars one by one came peeking out of the ether blue and seeming to look curiously down on me, and when at length the moon came up and gazed at the scene it was ten o'clock, as I could distinctly see on my watch dial by the light from the brute's eye-balls for they glowed like

Still he stood there hour after hour, almost motionless now, watching, it seemed to me, my very breath. The wolves came sneaking around and I tried to set them on him, but they were afraid of my voice and only ventured near enough to smell of his heels and then he kicked at them and finally been suffering from the grippe, are recovering.

Mrs. Tyle Woodworth and little son Harry have been very sick the past week the

murderous beast so near me that I could feel his hot breath. I shouted till I made myseif hoarse. I tried to snap bird shot into his eyes but all to no purpose.

Just then I happened to think that I had a bottle of chloroform m my pocket. I took it out and carefully uncorking it, held it to his nose. He avoided it by turning his head away, same as children do, but as he got somewhat under its influence he pushed forward for more and I gave it to him from my pocket handkerchief. It very soon began to show its effect in his eyes, which ceased to show its effect in his eyes, which ceased to glare at me and shortly his eyelids drooped, his knees weakened perceptibly and to my utter surprise he finally lay down, folding his legs under his body and throwing his head back on his side, he went to sleep. That was a happy moment for me. I jumped down and stretching myself proceeded to examine the now harmless animal.

ceeded to examine the now harmless animal.
His antiers were four feet from tip to tip
and judging from the prongs on them he
must have been forty years old or more. As
my enemy lay before me my animosity
a rainst him disappeared and I sat down
on his huge carcass and considered what was
best to do. I hadn't the heart to kill him as
he lay sleeping so imposently so I leaded best to do. I hadn't the heart to kill him as he lay sleeping so innocently, so I loaded my run and taking a lariat from my game bag I passed it over his horns and then gave it a turn around his neck and tied it to a small tree. Then I stirred him up till he reluctantly awoke and got on his feet with some little difficulty, but instead of showing fear or fight he bleated softly and coming toward me seemed to ask for more chloroform. He was gentie as a lamb, so picking up my gun I untied him and with the ad of a little chloroform on my handkerchief held out as a bait I led him very easily along to out as a bait I led him very easily along to to town where I arrived about daylight much to the surprise of the villagers. A conven-ient log cow stable was made to serve as a cage for the huge fellow, for a few days when a traveling showman bought him of me for \$250. My! but he was a daisy. Yes! it was a big one—I mean the deer.
